- ◆ 2016 Supplement to OMAFRA Vegetable Crop Protection Guide

2016 Supplement to OMAFRA Vegetable Crop Protection Guide

Ministry of Agriculture, Food and Rural Affairs

2016 SUPPLEMENT

Publication 838, Vegetable Crop Protection Guide 2014–2015

This supplement contains new product registrations and changes from November 2013 to November 2015. This supplement can be downloaded from the OMAFRA website at ontario.ca/crops. Printed copies are available from OMAFRA Resource Centres. For complete information, please see the full edition of Publication 838, *Vegetable Crop Protection Guide 2014–2015*.

To order copies of Publication 838:

- Visit the Service Ontario Publications website at ontario.ca/publications
- Contact the Service Ontario Publications Contact Centre at:
1-800-668-9938
416-326-5300
TTY 1-800-268-7095

The information in this publication is general information only. The Ministry of Agriculture, Food and Rural Affairs does not offer any warranty or guarantee, nor does it assume any liability for any crop loss, animal loss, health, safety or environmental hazard caused by the use of pesticides mentioned in this publication. This publication lists a number of brand names of pesticides. It is neither an endorsement of the product nor a suggestion that similar products are ineffective. Consult each product label before you use a pesticide.

The pest control product label is a legal document. It prescribes how the pest control product can be legally used. Users are responsible for ensuring that they are complying with all directions stipulated on the most current product label. Read the most current pest control product label thoroughly before application. Copies of all pest control product labels are posted online by the PMRA and may be found at: <http://pr.rp.hc-sc.gc.ca/fs-re/index-eng.php>

A crop group is a grouping of plant species based on botany and taxonomy (e.g., plant families), as well as on how the crops are produced. Crop groups are often further divided into smaller and more closely related subgroups. A pest control product may be registered on a subgroup, rather than the entire crop group.

Crop groupings are used primarily to set maximum residue limits and establish a common pre-harvest interval (PHI) for a similar set of crops. It is important to remember that not all products have a crop group registration, and products registered on one crop are not necessarily registered on all members of its crop group. A complete list of all crops included in both original and revised crop groups can be found at the following link on Health Canada's website: <http://www.hc-sc.gc.ca/cps-spc/pest/purs/protect-protecter/food-nourriture/rcgp-gpcr-eng.php>

Looking for what's new in field vegetable crop protection in Ontario? The 2016 supplement to the OMAFRA Vegetable Crop Protection Guide (<http://www.omafra.gov.on.ca/english/crops/vegpubs/vegpubs.htm>) (Pub. 838) is now available. The easiest way to get it fast is to contact OMAFRA's Ag Info Contact Centre at ag.info.omafra@ontario.ca or 1-877-424-1300 to request the PDF.

The 2016 supplement includes the information from the 2015 supplement and the more recent updates for 2016.
