

## Sweet Corn Settlement

Agreement has been reached with Bonduelle for the 2016 crop of sweet corn for processing as follows:

- Price is unchanged at \$96/ton.
- The white corn variety premium increased to \$12/ton from \$10/ton.
- All fungicides will be supplied and applied by the processor. This includes early applied, plant health fungicides. Where, by agreement, the grower looks after application, compensation will be made by the processor at a rate agreed upon by the parties.
- A prevented planting clause similar to that already present in the lima bean agreement was added to the sweet corn agreement. Briefly, where adverse weather conditions prevent planting of the sweet corn crop and an alternative crop is not planted, grower shall receive from the processor compensation equal to 20% of the growers crop insurance guarantee.
