VCR – Vegetable Crop Report – August 25th, 2022

The VCR (vegetable crop report) is a weekly update which includes crop updates, weather and growing degree summaries for various vegetable growing regions across Ontario.

Temperature – All regions continue to match or surpass their 10 year GDD average except for Peterborough. Daytime temperatures continue to range in the mid- to high- 20s. Nighttime temperatures are expected to range in the mid- teens up to low-20s. Some areas may see one or two nights in the low teens as well

Precipitation – All regions received at least some rain over this past week. Essex, Chatham-Kent, Goderich, and Peterborough are now almost at their 10 year average precipitation monthly total. Norfolk, Wellington, and Simcoe have now received approximately half their 10 year averages. Showers with the risk of thunderstorms are forecasted for the start of the week across Ontario.

Crop Updates

Unfortunately there are no new crop updates this week.

You can check out last week's post for information on brassica crops, celery, garlic, and onion. VCR – Vegetable Crop Report – August 18th, 2022(<https://onvegetables.com/2022/08/19/vcr2022-16/>)
