OMAFRA IPM Scout Training Workshops for 2022

All OMAFRA IPM workshops will be available online via Zoom and some will be recorded and made available on the ONhortcrops Youtube Channel. Some workshops (Brassica, Carrot & Onion, Tomato & Pepper, Apple, Tender Fruit and Grape) will be conducted in-person in combination with a virtual zoom option. **To register, please click the registration link under the specific workshop below.**

If you are unable to view a workshop due to a slower internet connection, please contact the workshop leader below for an alternative format. For all workshops, a laptop or computer with a display greater than 12" is strongly recommended. Some workshops may integrate Slido into the workshop as well, in which case a smart phone with internet connectivity is also recommended but not required.

Pre-recorded presentations are available on the [ONhortcrops YouTube channel](#). Where applicable, please watch these presentations prior to attending the webinar.

Introduction to IPM

May 3rd, 10:00 am – 3:00 pm

This workshop covers topics, such as the importance of integrated pest management, disease causal agents, characteristics, symptoms and damage of different insects and mites, scouting for weeds in horticulture crops, taking good diagnostic pictures, pesticide safety, soil diagnostics, symptoms of nutrient deficiencies, tissue sampling, invasive species and farm visit biosecurity. It is an introductory course that covers the basic information that scouts need to know. Other scouting workshops will build on this information and will be tailored to the specific crops.

- Workshop Leader – Denise Beaton
- Link to video conference and pdf of workshop slides to be provided after registration
- Pre-recorded presentations posted on the [ONhortcrops YouTube channel](#)
